

SUB-CONTRACT STEEL FABRICATION

A competitively priced fabricating service by one of the UK's most experienced steel product manufacturers.

JONES
OF OSWESTRY

WANT A BETTER OR MORE COMPETITIVELY PRICED STEEL FABRICATION SERVICE? NEED EXTRA PRODUCTION CAPACITY FOR YOUR STEEL PRODUCTS?

With over 50 years of manufacturing excellence, a 90,000sq ft. manufacturing site, plus a highly experienced workforce, Jones of Oswestry provide a sub-contract steel fabrication service - and at very competitive rates.

WHY SO COMPETITIVELY PRICED?

We have significant production capacity which currently satisfies not only our own product manufacturing needs, but also that of our sub-contract fabrication customers - with capacity to spare. So we can offer you very reasonable rates, it's that simple.

Turnkey package - We can supply the whole package too. From jig creation, one-off's, batch sub assembly fabrication to full product production. On-site steel finishing is also available, with shot blasting together with hot dip galvanising and our highly acclaimed DURAGALV post-galvanising process, which not only meets, but can exceed BS EN ISO 1461:1999 when required.

THE WORKS FROM JONES

Take a look at what Jones of Oswestry have to offer:

Laser Cutting - Mazak super turbo laser cutters for high-speed cutting, quality and accuracy. With this level of capability our in-house design team and skilled programming operatives can create any shape or design in mild or stainless steel from 1mm up to 12.5mm thick.

Plasma Cutting - Is also available, our Farley Wizard large bed cutters, measure up to 11m x 2m, for extensive larger steel profiling.

Guillotining and Automated Punch Presses - At the heart of the operation is a fully equipped steel fabrication unit including guillotines, presses and automated punch presses. Our ability to cut, punch and fold steel in-house means we are in total control of manufacturing quality.

Precision Welding, Fabricating - Our highly skilled, experienced team of welders and fabricators ensure that each and every product which leaves our premises is of the highest quality.

Quality Control - By demanding a consistently high level of quality, we put the products we make through extensive quality control checks to ensure they meet all accreditations and standards including: LPCB (Security and Fire Approvals), ISO9001 and ISO1400 and British Standards as necessary.

Load & Security Testing - We continually invest in new technology and are quite unique in having comprehensive testing facilities onsite, where we can accurately test load and provide extensive calculations and also check security compliance.
